

# Turning On The Faucets

*Allowing Abundance To Flow Into Your Life*

## BACKGROUND

There is a belief in the Jewish religion, that an individual's yearly income is decided at the beginning of the year, and this fixed income cannot be changed (except in very rare occasions). The benefit of holding this belief is the lack of effort to hold on to any single source of income.

Many people view their workplace and their boss as their single source of income. Becoming attached to ANY single source of income and holding the belief that without that source, you will have little or even no income, is a very stressful belief. The Jewish alternative frees your mind and allows you to simply expect abundance, no matter what will be the faucet through which money will flow to you.

The following exercise is designed to help you set up different possible income faucets, simply so you can believe that abundance is not limited to your current source of income.
